Pandacan, Manila City, Philippines | jacobfagut1@gmail.com | +63 907 306 1321

SUMMARY

Fresh BS Information Technology graduate from the Technological Institute of the Philippines – Manila with experience in full-stack web development, REST API development and database management through academic projects and a 500-hour internship. Seeking a Junior Software Developer or Software Engineer position where I can contribute to building scalable, secure, and user-focused applications.

EDUCATION

Technological Institute of the Philippines – Manila

Bachelor of Science in Information Technology

June 2026

EXPERIENCE

Software Development Intern

January 2026 – April 2026 (500 Hours)

Frannos Innovation and Arts

- Assisted in software development, testing, debugging, and system implementation.
- Developed and tested ESP32-based IoT solutions integrated with MAX6675 temperature sensors.
- Configured MQTT communication for real-time cloud-based sensor monitoring.
- Performed troubleshooting and system integration for software and hardware components.
- Collaborated with the development team to improve system reliability and overall performance.

PROJECTS

Hirerayah: An AI-Powered Solution for Bridging Employment Gaps (Capstone Project) | Frontend: React.js, Bootstrap | Backend: Node.js, Express.js, Flask | Database: MongoDB Atlas | AI Technologies: Python, BERT, SHAP, Cosine Similarity | Authentication & Security: JWT, bcrypt | Deployment: Vercel, Render

- Developed a full-stack recruitment platform for HR personnel and job applicants.
- Built responsive dashboards for applicant management, job postings, and recruitment analytics using React.js.
- Developed RESTful APIs using Node.js and Express.js.
- Designed and managed MongoDB Atlas databases for applicants, employers, and recruitment records.
- Implemented AI-powered resume screening using BERT, Cosine Similarity, and SHAP to evaluate applicant compatibility and provide explainable candidate rankings.
- Implemented secure authentication using JWT and bcrypt.
- Deployed the frontend on Vercel and backend services on Render.

Let Em' Cook: AI-Powered Recipe Generation Platform | Backend: Django | Programming Language: Python | Database: PostgreSQL

- Developed a web-based recipe generation platform based on user ingredients and preferences.
- Built backend functionality using Django.
- Designed and managed PostgreSQL databases.
- Applied STRIDE and DREAD threat modeling to strengthen application security.

IoT Anti-Theft Detection System | Hardware: Arduino, ESP32, SIM800L

- Developed an embedded anti-theft security system using motion detection and fingerprint authentication.
- Integrated GSM notifications to provide real-time security alerts.
- Improved system reliability through automated detection and remote notification.

Fitness Tracking Mobile Application | Programming Language: Java | Development Tool: Android Studio

- Developed a mobile application for tracking walking, running, and cycling activities.

- Implemented activity monitoring and user performance tracking.
- Designed an intuitive user interface that promotes healthy lifestyle habits.

TECHNICAL SKILLS

Programming Languages

- JavaScript
- Python
- C#
- PHP
- SQL
- C++

Frontend Development

- React.js
- HTML5
- CSS3
- Bootstrap

Backend Development

- Node.js
- Express.js
- Laravel
- Django

Databases

- MongoDB
- MongoDB Atlas
- MySQL
- PostgreSQL

API & Authentication

- REST API Development
- JSON Web Token (JWT)
- bcrypt
- Role-Based Access Control (RBAC)
- Vercel
- Render
- Version Control
- Git

Development Tools

- Visual Studio
- Visual Studio Code
- Android Studio
- Arduino IDE
- XAMPP
- Postman

IoT & Embedded Systems

- ESP32
- MQTT
- MAX6675

CERTIFICATIONS

AI Governance and Trust: Building Responsible and Transparent Artificial Intelligence

Beyond the Clouds: Learning the Art of Cloud Computing

Professional Mastery in Project Management and Agile Practices

DevJourney: Mapping the Developer's Career

Across the Cyber-Verse: With Great Power Comes Great Cyber-Responsibility
